EDUCATION

GEORGIA TECH

MASTERS OF SCIENCE, COMPUTER SCIENCE

Attended Aug 2016 - May 2018
15 hours completed

TEXAS STATE UNIVERSITY

BS IN COMPUTER SCIENCE

May 2014 | San Marcos, Tx
Major GPA: 3.8
Math Minor
College of Engineering
Dean's List (Fall 13, Spring 14)

COURSEWORK

Computer Security
High Performance Computer Arch
Networks
Software Test and Analysis

SKILLS

PROGRAMMING

Frameworks
Spring Boot • terraform • Playwright

Proficient Languages

Python • TypeScript • Go • Java

Familiar Languages

Scala • Ruby • Bash • C++

AI Tooling

MCP • Claude Code • Cursor •
OpenCode

DEPLOYMENT/CI

Buildkite • Jenkins • mvn
Gradle • Docker • GitOps

CLOUD SERVICES

elasticsearch • AWS • GCP • Azure
IBM Softlayer • Oracle CRM DB

PROJECTS

RC TRACK RENTAL

Full-stack TypeScript app: Next.js, Stripe,
Prisma, Docker, Playwright.

RELATED INTERESTS

- Scuba Diving
- DIY Home and Car Maintenance
- R/C Cars, Planes, and Quadcopters

EXPERIENCE

GEICO | Lead Software Engineer

December 2024 - Current | Remote

- Contribute to open-source AI development tooling: **beads** (agent memory system), **gastown** (multi-agent harness), and **code-review-graph** (context engineering for coding agents).
- Built Cursor hooks, an OpenCode plugin, and automation scripts that let the entire claims org adopt these agent workflows reliably at scale.
- Drove adoption of Dependabot across the claims org to automate dependency updates so vulnerability scans always passed.
- Lead the implementation of C.O.R.E. (Spring Boot, Temporal, Kafka), a low-code, configuration-driven framework that lets domain teams author their own rules for when and how customer communications are sent.
- Lead the team through architectural decisions and design reviews.

ELASTICSEARCH | Principal Software Engineer

April 2018 - November 2024 | Remote

Joined pre-IPO at <1,000 employees

- Built a Gradle plugin and PR-workflow integration that kept each service's SBOM continuously in sync with its latest dependencies.
- Integrated Chainguard container images into engineering workflows to strengthen software supply chain security.
- Built internal developer productivity tooling in Go and Python to automate deployments, testing infrastructure, and release validation.
- Led migration of Elastic Cloud's engineering organization from Jenkins to Buildkite, modernizing CI/CD infrastructure and developer workflows.
- Built the Release Exit Check quality gate to assert release health across cloud providers and regions, and served as platform admin remediating broken deployments on the customer-facing support queue.

JAMF | Software Engineer II

October 2015 - March 2018 | Eau Claire, WI

- Implemented Client Reservation Server using Spring Boot, Docker, and Gradle. Used MySQL, H2, and Swagger Code Gen.
- Implemented REST client for legacy Customer API using Spring and JaxB.
- Led team of 5 others to automate existing manual regression suite.
- Led intern project to expose the MacOS Accessibility API via a Swift REST server so that we could control applications on the screen in a VNC session.

IBM | Cloud Infrastructure Services - Software Engineer

May 2014 - June 2015 | Austin, TX

- Deployed OpenStack Object Storage using Chef
- Wrote an automated capacity manager using Python for OpenStack Swift
- Automated Ring building for OpenStack Swift using Chef

SAN FRANCISCO CONSULTING GROUP

Software Engineering Intern

May 2013 - Sept 2013 | Austin, TX

- Wrote PHP and jQuery to perform custom CRUD operations

CITY OF AUSTIN PARKS AND RECREATION PARKS DIVISION

Supervisor, Manager, Maintenance, Lifeguard Instructor

May 2004 - Aug 2012 | Austin, TX

- 9 years management, leadership, and teaching experience
- Managed and trained 70+ ARC Lifeguards across 6 sites
